THE BIG ENERGY RACE

01- 30 NOV 2024

Power up your coffee with the Big Energy Race

DID YOU KNOW? Taking the stairs instead of the lift saves 2.5kWh per floor, five times the 0.5kWh it took to brew your coffee.

To help all of us do our bit for the planet, we're launching the **Workspace Big Energy Race** to encourage everyone to save energy together.

The Workspace building in each of the four corners of London and South-East England that beats its energy-saving target by the biggest margin will **win trees planted in the UK, named after your building.**

WORKSPACE[®]

THE BIG ENERGY RACE

01 - 30 NOV 2024

DID YOU KNOW?

The energy wasted in London office buildings every year would power 65,000 homes?

Here's five energy saving hacks that could help win you trees planted.*

**Ts & Cs apply*

1

Switch off the lights when you're not in the office

Office lights left on overnight use enough energy to heat a home for a year.

Take the stairs instead of the lift

A 15 second lift journey consumes as much energy as a 60w lightbulb does in an hour.

2

3

Unplug your chargers

Even if it's not powering up your smart phone, a plugged in charger is still using electricity.

Switch off your PCs when you're out

You could save around £45 per year per computer.

4

5

Turn the heating down a little (if you're comfortable)

You could save a hot air balloon worth of CO2 from one office alone.
